

aPhinity SP[®]

A Better Method of Detection

Technical Information

Target Pest

Saddled Prominent (*Heterocampa guttivitta*)

Host

A wide range of hardwoods including: beech, sugar maple, yellow birch and paper birch

Active Ingredient

(9:1) Z13Y11-16 Ald. Blend

Storage Information

Store for up to 2 years at -18° C

Load Rate + Release Rate

10µg Load

Product Information

aPhinity SP is a pheromone lure, that is a highly effective tool for detection of Saddled Prominent in low density populations and for monitoring in higher volumes

The active ingredient, (9:1) Z13Y11-16 Ald. Blend, simulates the female sex pheromone and is used to attract male Saddled Prominent moths into a sticky trap.
